

2030 goal: to be recognized as the responsible leader in the production of sterile and non-sterile liquids. Our commitments by pillar:

Pillar 1 - Solutions: Innovating while controlling our impact

At Unither, we develop healthcare solutions that combine innovation and responsibility. From the design stage onwards, we integrate medical, social, and environmental criteria to better meet patient expectations and limit our ecological footprint.

Our core business is based on the production of single-dose packaging, with one key material: plastic. Used rationally, it ensures patient safety, sterility, and accessibility of treatments.

Our main commitments:

- Design responsible products, supported by comprehensive environmental dossiers (LCA, eco-score, recyclability).
- Identify and replace risky materials (PFAS, mineral oils, TiO₂, etc.) with safer alternatives.
- Promote sustainable innovation through the InnoSphere chain and a CSR grid integrated into our projects.

Pillar 2 - Factories: Reducing our impact

We measure and reduce our environmental footprint at every stage, from raw materials to finished products.

A comprehensive carbon footprint assessment (Scope 1, 2, 3) carried out at all our sites enables us to target our actions and steer our decarbonization strategy in line with SBTi standards.

Our priority levers:

- Optimization of sterile single-dose formats (Blow-Fill-Seal)
- Control of energy consumption (ISO 50001 objective)
- Material recycling loops (e.g., LDPE in Gannat)

Pillar 3 - Teams: Developing talent

We place people at the heart of our sustainable performance by fostering a safe and meaningful work environment.

Our areas of commitment:

- Training, professional development, and management
- Professional equality and diversity
- Respect for fundamental rights (code of conduct, harassment prevention, non-discrimination)

Pillar 4 - Community: Anchoring ourselves in a responsible ecosystem

We build lasting partnerships with our suppliers and local stakeholders, integrating CSR criteria into every purchasing decision.

Our concrete commitments:

- Responsible purchasing policy shared with our partners (see Unither's purchasing charter)
 - Integration of social, environmental, and ethical criteria in the selection of our service providers
 - EcoVadis silver medal target by 2026
- Target to join the Global Compact by 2026
